

Lucky Lamp Wall

Design by Albi Serfaty

Lucky Lamp features a polymer-sprayed shade that uses laser cut technique and scrupulous handcraft. Unique to this lamp is a technology of 920 addressable RGB LEDs, where each light is controlled by a micro-computer to alter colour, motion and intensity. This technology enables Lucky Lamp to display five motion-lighting variants - Kaleidoscop, Fire, Water, Earth, Wind and an adaptable, ambient experience with Warm, Natural and Cold colour temperatures. The 920 LEDs enable both the color and motion options to be dimmable from 0.1 to 100% using a single control button.

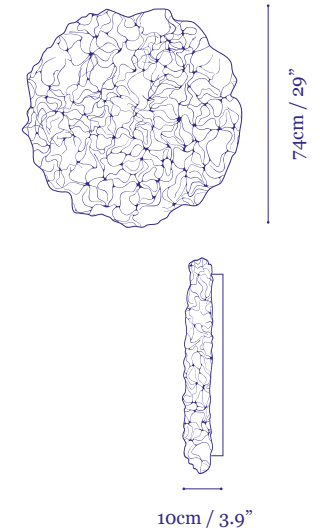

100-240 V
10120 Lumen
920 addressable RGB LED's

On the lamp
One on/off switch
One push button to switch between 8 programs
and control 0.1%-100% dimming

Package
Volume: 86 x 86 x 25cm, 33.8 x 33.8 x 9.8"
Weight: 11kg / 24lb

Dimensions:

Rev. 1.0
